

Mohamed Wael Tamaa

Objective

SEO WordPress Developer focused on building professional, user friendly, and performance optimised websites using WordPress, Elementor, WooCommerce, technical SEO, AEO, GEO, UI/UX improvements, website automation, and modern AI tools to enhance content, optimisation, analysis, and workflow efficiency. I also have a background in HR systems, which supports my ability to work with structured data, workflows, reporting, and process improvement.

Work History

WordPress Developer & SEO Specialist

Jidar App | KSA | Remote

May 2026 – Present

- Developed, customised, and maintained professional WordPress websites using Elementor, Elementor Pro, WooCommerce, HTML, CSS, JavaScript, jQuery, PHP basics, and responsive design techniques.
- Built modern, user friendly, and mobile responsive website pages with a strong focus on UI/UX, clean layouts, clear user journeys, accessibility, and conversion focused design.
- Created and customised landing pages, service pages, blog templates, archive layouts, headers, footers, forms, popups, and reusable website sections.
- Improved website performance through Core Web Vitals optimisation, image optimisation, lazy loading, caching, code cleanup, plugin optimisation, and speed improvement using tools such as LifeSpeed Cache and PageSpeed Insights.
- Implemented technical SEO improvements including meta titles, meta descriptions, heading structure, schema markup, internal linking, sitemap optimisation, robots.txt, canonical tags, redirects, and indexability fixes.
- Managed SEO tools such as Google Search Console, Google Analytics, Yoast SEO, Rank Math, and website audit tools to monitor rankings, traffic, indexing, errors, and performance opportunities.
